

Approved Land Uses, Resource Concerns, and Conservation Practices to Support the National Seasonal High Tunnel Initiative

Approved Land Use

Crop

Approved Resource Concerns

Soil Quality Degradation
Organic Matter Depletion
Water Quality Degradation
Nutrients in Surface Water
Pesticides in Surface Water
Degraded Plant Condition
Undesirable Plant Productivity and Health

Approved Conservation Practices (CPs)

Core CPs —A CP listed in the electronic Field Office Technical Guide (eFOTG) that is essential to address the natural resource concerns identified by an initiative.	Code
Seasonal High Tunnel System for Crops	798

Supporting CPs —A CP listed in the eFOTG that may be needed to facilitate the implementation of a core CP or, along with other approved CPs, needed to address the natural resource concerns identified by the initiative.	Code
Critical Area Planting	342
Diversion	362
Grassed Waterway	412
Irrigation System, Microirrigation	441
Subsurface Drain	606
Underground Outlet	620

Conservation Practice—Resource Concern Matrix

NRCS Approved Resource Concerns		Soil Quality Degradation	Water Quality Degradation		Degraded Plant Condition
NRCS Natural Resource Concern Categories for ProTracts Application, Evaluation, and Ranking Tool (AERT) "C" = Core practice (Bold) required to be offered. "X" - Supporting practices are optional to be offered		Organic Matter Depletion	Nutrients in Surface Water	Pesticides in Surface Water	Undesirable Plant Productivity and Health
Conservation Practice	Code				
Seasonal High Tunnel System for Crops	798	C	C	C	C
Critical Area Planting	342				
Diversion	362				
Grassed Waterway	412				
Irrigation System, Micro Irrigation	441				X
Subsurface Drain	606				
Underground Outlet	620
